25.4 Whenever the Supplier is ready to carry out any such test and inspection, it shall give a reasonable advance notice, including the place and time, to the Purchaser. The Supplier shall obtain from any relevant third party or manufacturer any necessary permission or consent to enable the Purchaser or its designated representative to attend the test and/or inspection.

**26. Liquidated Damages**

26.1 Except as provided under CC Clause 31, if the Supplier fails to deliver any or all of the Goods by the Date(s) of delivery or perform the Related Services within the period specified in the Contract, the Purchaser may without prejudice to all its other remedies under the Contract, deduct from the Contract Price, as liquidated damages, a sum equivalent to the percentage specified in the Contract Data of the delivered price of the delayed Goods or unperformed Services for each week or part thereof of delay until actual delivery or performance, up to a maximum deduction of the percentage specified in those Contract Data. Once the maximum is reached, the Purchaser may terminate the Contract pursuant to CC Clause 34.

27.4 The Purchaser shall give notice to the Supplier stating the nature of any such defects together with all available evidence thereof, promptly following the discovery thereof. The Purchaser shall afford all reasonable opportunity for the Supplier to inspect such defects.

27.5 Upon receipt of such notice, the Supplier shall, within the period specified in the Contract Data, expeditiously repair or replace the defective Goods or parts thereof, at no cost to the Purchaser.

27.6 If having been notified, the Supplier fails to remedy the defect within the period specified in the Contract Data, the Purchaser may proceed to take within a reasonable period such remedial action as may be necessary, at the Supplier’s risk and expense and without prejudice to any other rights which the Purchaser may have against the Supplier under the Contract.

**28. Patent Indemnity**

28.1 The Supplier shall, subject to the Purchaser’s compliance with CC Sub-Clause 28.2, indemnify and hold harmless the Purchaser and its employees and officers from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of any nature, including attorney’s fees and expenses, which the Purchaser may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright, or other intellectual property right registered or otherwise existing at the date of the Contract by reason of:

28.4 The Purchaser shall, at the Supplier's request, afford all available assistance to the Supplier in conducting such proceedings or claim, and shall be reimbursed by the Supplier for all reasonable expenses incurred in so doing.

28.5 The Purchaser shall indemnify and hold harmless the Supplier and its employees, officers, and Subcontractors from and against any and all suits, actions or administrative proceedings, claims, demands, losses, damages, costs, and expenses of any nature, including attorney's fees and expenses, which the Supplier may suffer as a result of any infringement or alleged infringement of any patent, utility model, registered design, trademark, copyright, or other intellectual property right registered or otherwise existing at the date of the Contract arising out of or in connection with any design, data, drawing, specification, or other documents or materials provided or designed by or on behalf of the Purchaser.

29. Limitation of Liability

29.1 Except in cases of criminal negligence or willful misconduct,
(a) the Supplier shall not be liable to the Purchaser, whether in contract, tort, or otherwise, for any indirect or consequential loss or damage, loss of use, loss of production, or loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the Supplier to pay liquidated damages to the Purchaser and
(b) the aggregate liability of the Supplier to the Purchaser, whether under the Contract, in tort or otherwise, shall not exceed the total Contract Price, provided that this limitation shall not apply to the cost of repairing or replacing defective equipment, or to any obligation of the supplier to indemnify the purchaser with respect to patent infringement

(c)

Notwithstanding the foregoing, such additional or reduced cost shall not be separately paid or credited if the same has already been accounted for in the price adjustment provisions where applicable, in accordance with CC Clause 14.

31. Force Majeure

31.1 The Supplier shall not be liable for forfeiture of its Performance Security, liquidated damages, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

31.2 For purposes of this Clause, “Force Majeure” means an event or situation beyond the control of the Supplier that is not foreseeable, is unavoidable, and its origin is not due to negligence or lack of care on the part of the Supplier. Such events may include, but not be limited to, acts of the Purchaser in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes.

31.3 If a Force Majeure situation arises, the Supplier shall promptly notify the Purchaser in writing of such condition and the cause thereof. Unless otherwise directed by the Purchaser in writing, the Supplier shall continue to perform its obligations under the Contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

Any claims by the Supplier for adjustment under this Clause must be asserted within twenty-eight (28) days from the date of the Supplier’s receipt of the Purchaser’s change order.

Subject to the above, no variation in or modification of the terms of the Contract shall be made except by written amendment signed by the parties.

33. Extensions of Time

33.1 If at any time during performance of the Contract, the Supplier or its subcontractors should encounter conditions impeding timely delivery of the Goods or completion of Related Services pursuant to CC Clause 12, the Supplier shall promptly notify the Purchaser in writing of the delay, its likely duration, and its cause. As soon as practicable after receipt of the Supplier’s notice, the Purchaser shall evaluate the situation and may at its discretion extend the Supplier’s time for performance, in which case the extension shall be ratified by the parties by amendment of the Contract.

33.2 Except in case of Force Majeure, as provided under CC Clause 31, a delay by the Supplier in the performance of its Delivery and Completion obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to CC Clause 26, unless an extension of time is agreed upon, pursuant to CC Sub-Clause 33.1.

Technical Specification for 200 KW Prime Generator

Eastern University of Sri Lanka [EUSL] Trincomalee

1.0 GENERAL

1.1. DESCRIPTION

The Contractor shall supply, Delivery to site, install and commission the generator set, generator control panel, Auto Change Over Switch and fuel day tank { Base tank }, which shall form part of the Works.

The Contractor shall be responsible for moving the generator set into position, installing the exhaust pipes, silencers, making all necessary connection to the generator control panel, fuel system, batteries, etc. and all necessary equipment for putting the set into operation
The generator shall have a continuous output rating as given in the Generator data.

The system shall automatically be started upon the receipt of a mains failure signal from CEB Mains. The Generator shall be in a position to deliver its total output in 15 seconds or as per Program, and deliver power to the Main Switch Board.

Upon the restoration of the mains, the diesel generator set shall remain running for a period of not less than ten minutes to allow stabilizing of the thermal characteristics of the engine and then automatically shut down.

1.2 STANDARED

All equipment, materials and workmanship shall comply with the appropriate British Standards [BS EN 800 : 1988] or an acceptable equivalent international standard as well as all local statutory obligations and regulations.

1.3 ATMOSPHERIC CONDITIONS

Maximum average temperature: 45 deg.C
Average Daily Temperature: 28 deg.C
Humidity: 40% to 100%
Altitude : < 1000 m

1.4 DESCRIPTION OF OPERATION

The Prime Generator set shall be diesel engine driven and mounted on a skid base frame of rigid construction. The generating set shall have a continuously rated output at the specified site of not less than that of specified rating. The generating set shall be installed for automatic operation during power failures.

2.0 ENGINE

The engine shall be four stroke, naturally aspirated or pressure charged, air/water cooled, direct injection, compression ignition type, capable of cold starting and complying with BS 7698-3 and ISO 8528-3.

The engine speed to be 1500 RPM.

- The engine shall be capable of delivering not less than the power required by the full load rating of generator after derating due to ambient conditions above, and after deducting the power take-off for engine driven auxiliaries including lubricating oil pump, circulating water pump if applicable, radiator or cooling air fan exciter.

The engine generating set shall be capable of an overload of 10% for one hour in any period of 12 hours continuous running.

3.0 ALTERNATOR
The alternator shall be directly coupled to diesel engine through bolted flanges, and of drip proof, screen protected, revolving field, salient pole with damper windings, Class E insulation to B.S. 2757, brushless and self regulating type and continuously site rated to comply with engine BHP according to B.S. 2613.

The generator shall be mounted on a fabricated steel under-frame by means of oil resistant mountings of the shear compression type so that the entire unit can be bolted to a solid concrete floor without transmitting vibration to adjacent apparatus or to any part of the building.

All electrical terminations shall be made with spring washer to ensure good and reliable contact.

Neutral point of the alternator shall be solidly earthed.

Electric heater where necessary shall be provided in the alternator stator to prevent condensation.

The performance requirements of the alternator shall be as follows: - Steady-State Capacity and Performance Requirement

a) Alternator rating : 3 Phase, 200 KW
b) Power factor : 0.8
c) Nominal frequency at rated kW : 50 Hz
d) Synchronous operated speed : 1500 rpm
e) Line to line voltage at rated output: 400 V
4.0 EXCITATION SYSTEM

The Excitation system shall be Brushless excitation systems, with rotating exciter machines and Automatic Voltage Regulator (AVR),

5.0 STARTING SYSTEM

The electric starting system shall be provided complete with engine mounted motor and starting System, 24 volts heavy duty maintenance free battery of ample rating for seven successive starts of 15 seconds with rest interval of 10 seconds or attempts to start without re-charging, and all necessary wiring between these components.

The battery charger with dual charging rate (trickle and booster), and Provided with ammeter and voltmeter.

The battery charger failure protection unit shall be fitted in the charger unit and arranged to operate in the event of the battery voltage falling below normal float level for a period of more than 30 minutes.

6.0 AUTOMATIC MAINS FAILURE CONTROL SYSTEM

The generator control equipment shall be designed to provide a back up power supply in the event of partial or complete failure of the mains supply, signaled by the mains failure relay in the main supply switch board.
The generator control equipment shall operate in the following sequence:

a) On mains failure, the diesel engine shall start and within 15 seconds transfer the load by the changeover switch to the generator. (Adjustment as per equipment)
b) On mains supply available, with 5 minutes time delay (adjustable 1 to 10 minutes) shall transfer the load back to the mains.
c) The generator set shall continue to run off load for a further time period of 10 minutes (adjustable 0 - 15 minutes) and automatically shut down if the mains supply is maintained. During this time, a further mains supply failure shall effect an immediate transfer of load back to the generator and sequences b and c are repeated.

7.0 EARTHING

All non-current carrying metal parts shall be bonded and effectively to earth. The neutral of the generator to be solidly earth. The overall resistance of the earthing system shall be less than 10 ohm.

8.0 INSTRUMENTS

The instruments to be provided shall include ammeter with selector switch, voltmeter with selector switch, frequency meter, power factor meter, kilowatt-hour meter, kilowatt meter, hour run meter, attempt-start counter with manual reset.

9.0 INDICATION LAMPS

Indicating lamps shall be provided to:

(8.1) Indicate status of normal CEB Supply
(8.2) Indicate status of changeover [ATS], Switch.
(8.4) Warn that selector switch is not set in "AUTO" position
(8.5) Warn that emergency stop button is in "OFF" position
(8.6) Warn that main MCCB is in "OFF" or "TRIP" position

10.0 EXHAUST SYSTEM

The exhaust gas from the engine manifold shall be connected to the turbo charger through a flexible joint. The Exhaust pipe to be about 1 Meter from the building and the exhaust to be at 3 meter height.
